YOUR OPERATIONAL NEEDS

Facing a breakdown, a shutdown or a new project?

Equipment breakdown

Need to find a fault and get equipment repaired.

Planned shutdown

Planning service or installation work within a limited time window.

Lack of capacity

Short of specialists or technical capacity for a specific job.

Production upgrade

Need to boost efficiency, adapt technology or automate a process.

Equipment relocation

Planning to move a machine, a technology unit or a production line.

Operational changes

Looking for a partner to coordinate technical and construction work.

ABOUT US

One partner. From a single call to the whole project

PILSEN INDUSTRY was founded to provide industrial companies with comprehensive technical support without unnecessary paperwork or the complex coordination of multiple suppliers.

We build on years of experience in manufacturing, industrial maintenance and technical project management. We deliver everything from single service calls to larger industrial projects.

Flexible solutions

We tailor the scope of services and expertise to each customer's needs.

Turnkey project

We coordinate specialist trades and supplies from preparation to project handover.

EXPERIENCE

We know machines. We know your plant.

When solving technical problems, we consider how production equipment is linked, operating conditions and maintenance requirements. We draw on hands-on experience from industry and technical project management.

01

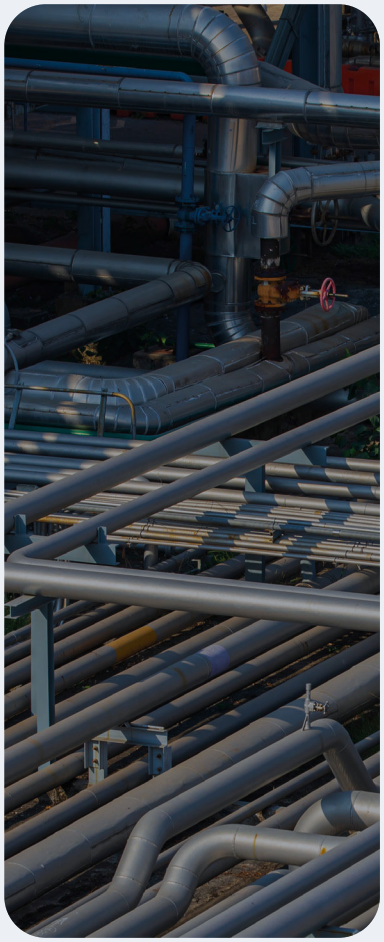

KNOWLEDGE OF OPERATIONS

We consider operating conditions, technology links and the need to minimise downtime.

02

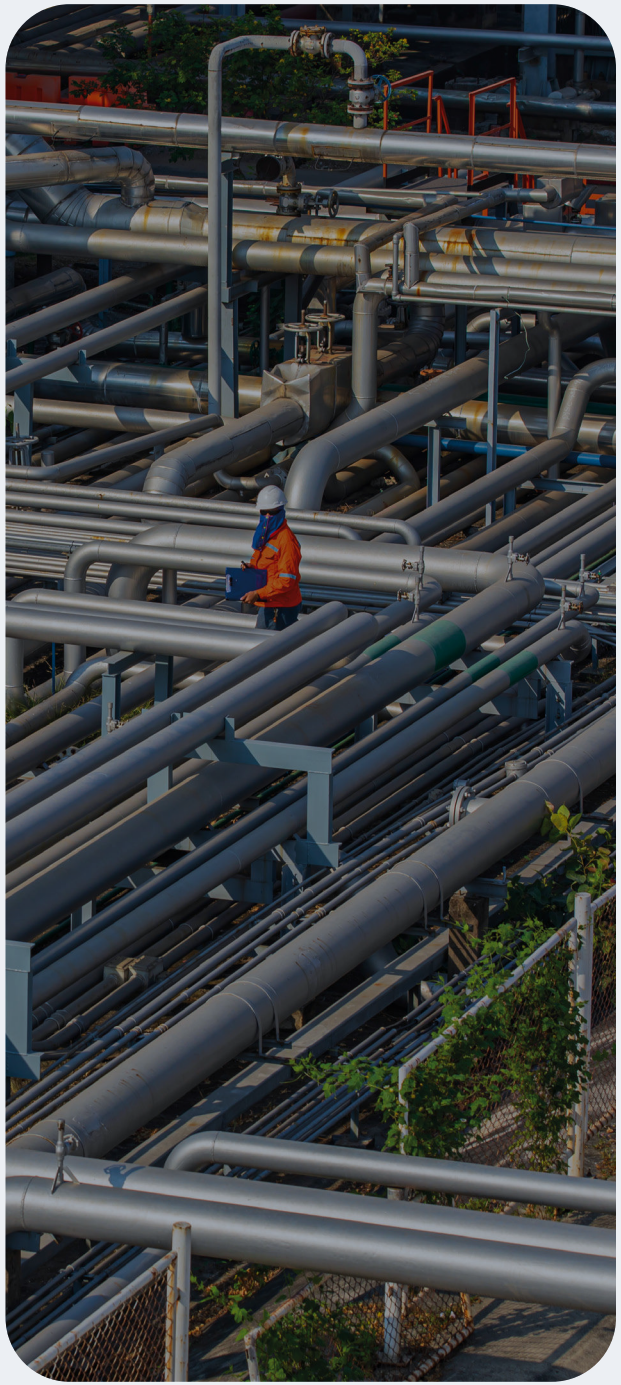

CZECH REPUBLIC & ABROAD

Experience from industrial environments at home and abroad.

15+ years
experience

Long-standing practice in industrial maintenance, production technology and technical project management.

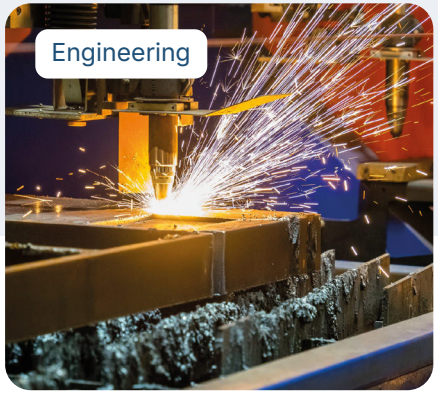

OUR FOCUS

Industries we serve

Every industry has its own technologies and operating requirements.
We adapt the scope of our services to the conditions of each plant.

OUR SERVICES

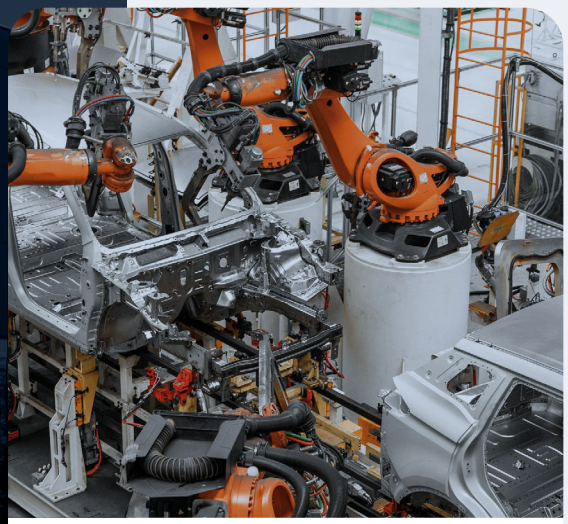

01

What we deliver for you

Service & maintenance

Industrial service, repairs, equipment maintenance and technical support for reliable production.

Technology & automation

Upgrades of production technology, robotics and automation of industrial processes.

Installation & relocation

Installation, dismantling and relocation of single machines and complete production lines.

>> More services

OUR SERVICES

02

Support for your entire site

Industrial projects

Steel structures, electrical and construction work in industrial facilities.

Facility services

Technical facility management, maintenance and support services for production sites.

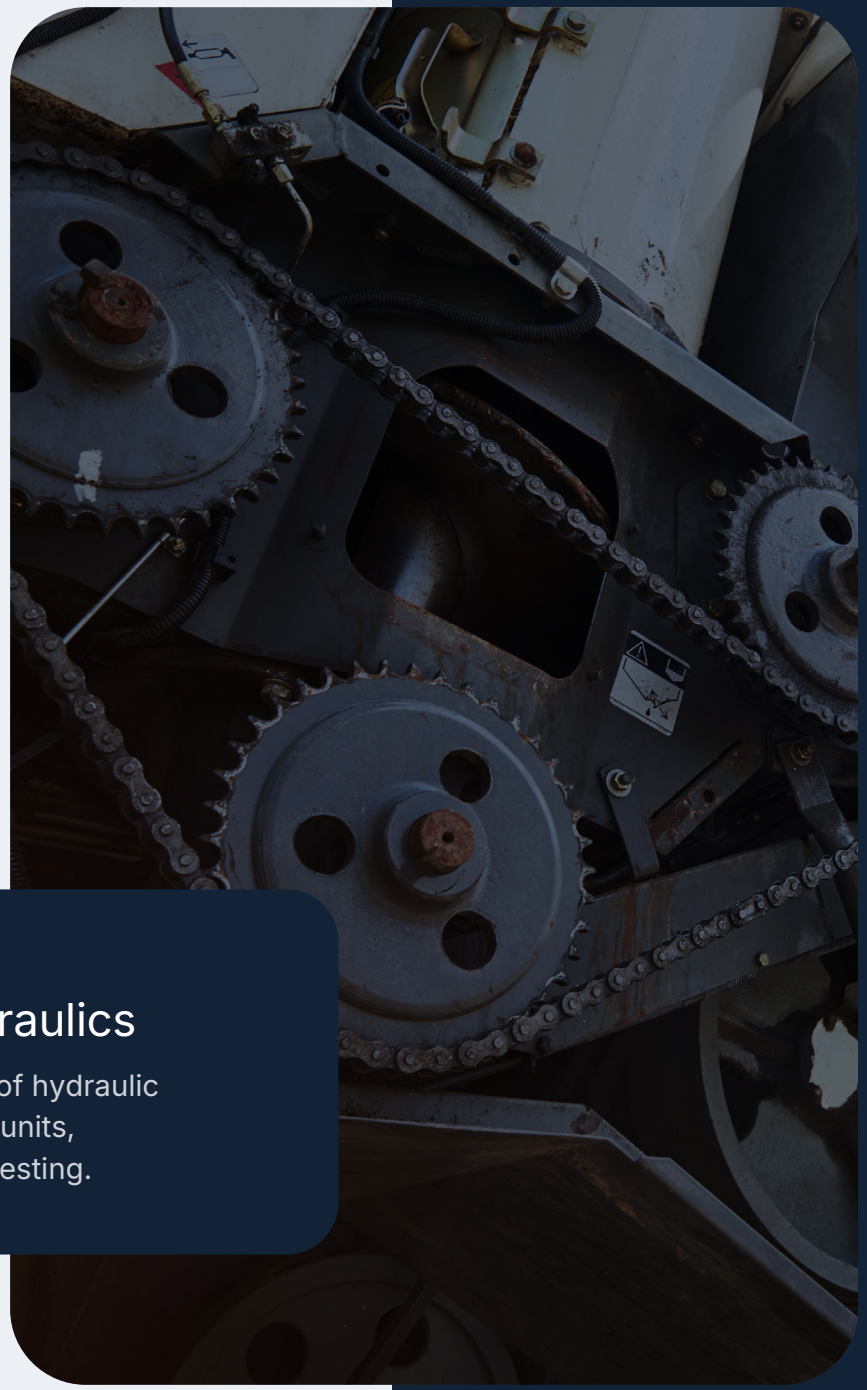

Express transport

Express transport of spare parts, components and technical materials in the Czech Republic and abroad.

SERVICE & MAINTENANCE

When a drive failure stops production

We provide diagnostics, repairs and technical support for industrial equipment. We specialise in gearboxes, drives and hydraulic systems, including dismantling, logistics and reassembly.

01

Gearboxes & drives

Fault diagnostics, repair and overhaul of industrial gearboxes and drives. If needed, we also provide replacement equipment.

Industrial hydraulics

Repair and overhaul of hydraulic cylinders and power units, including functional testing.

TECHNOLOGY & AUTOMATION

Upgrades for more efficient production

We help modernise production technology, automate processes and raise efficiency. We modify equipment and integrate new machines into existing plants.

Process automation

Robotic cells, handling systems and process automation.

Equipment upgrades

Technical modifications to machines, electrics and control systems.

Integration & start-up

Linking technology units and support with commissioning.

02

03

INSTALLATION & RELOCATION

Relocation from dismantling to start-up

We relocate machines and production lines from technical preparation and dismantling through handling and transport to installation and commissioning.

Individual machines

Relocation of stand-alone machines or parts of production technology.

Complete production lines

Coordination of linked equipment, specialist trades and relocation phases.

- Dismantling
- Handling & transport
- Installation

INDUSTRIAL PROJECTS

Multiple trades. One coordinator

When adapting and upgrading industrial operations, we coordinate structural, electrical and construction work. We tailor the scope to the technical brief and the customer's operating conditions.

Turnkey steel structures

From survey and design through fabrication to installation and handover.

Electrical & construction work

Upgrades to technical infrastructure and spaces for new and existing technology.

WAYS TO WORK WITH US

01

Service call

Fault diagnostics, equipment repair or a specific service task.

02

Technical project

A single part of a project or coordination of the whole delivery.

03

Planned shutdown

Technical staff and resources for service, maintenance and installation work.

04

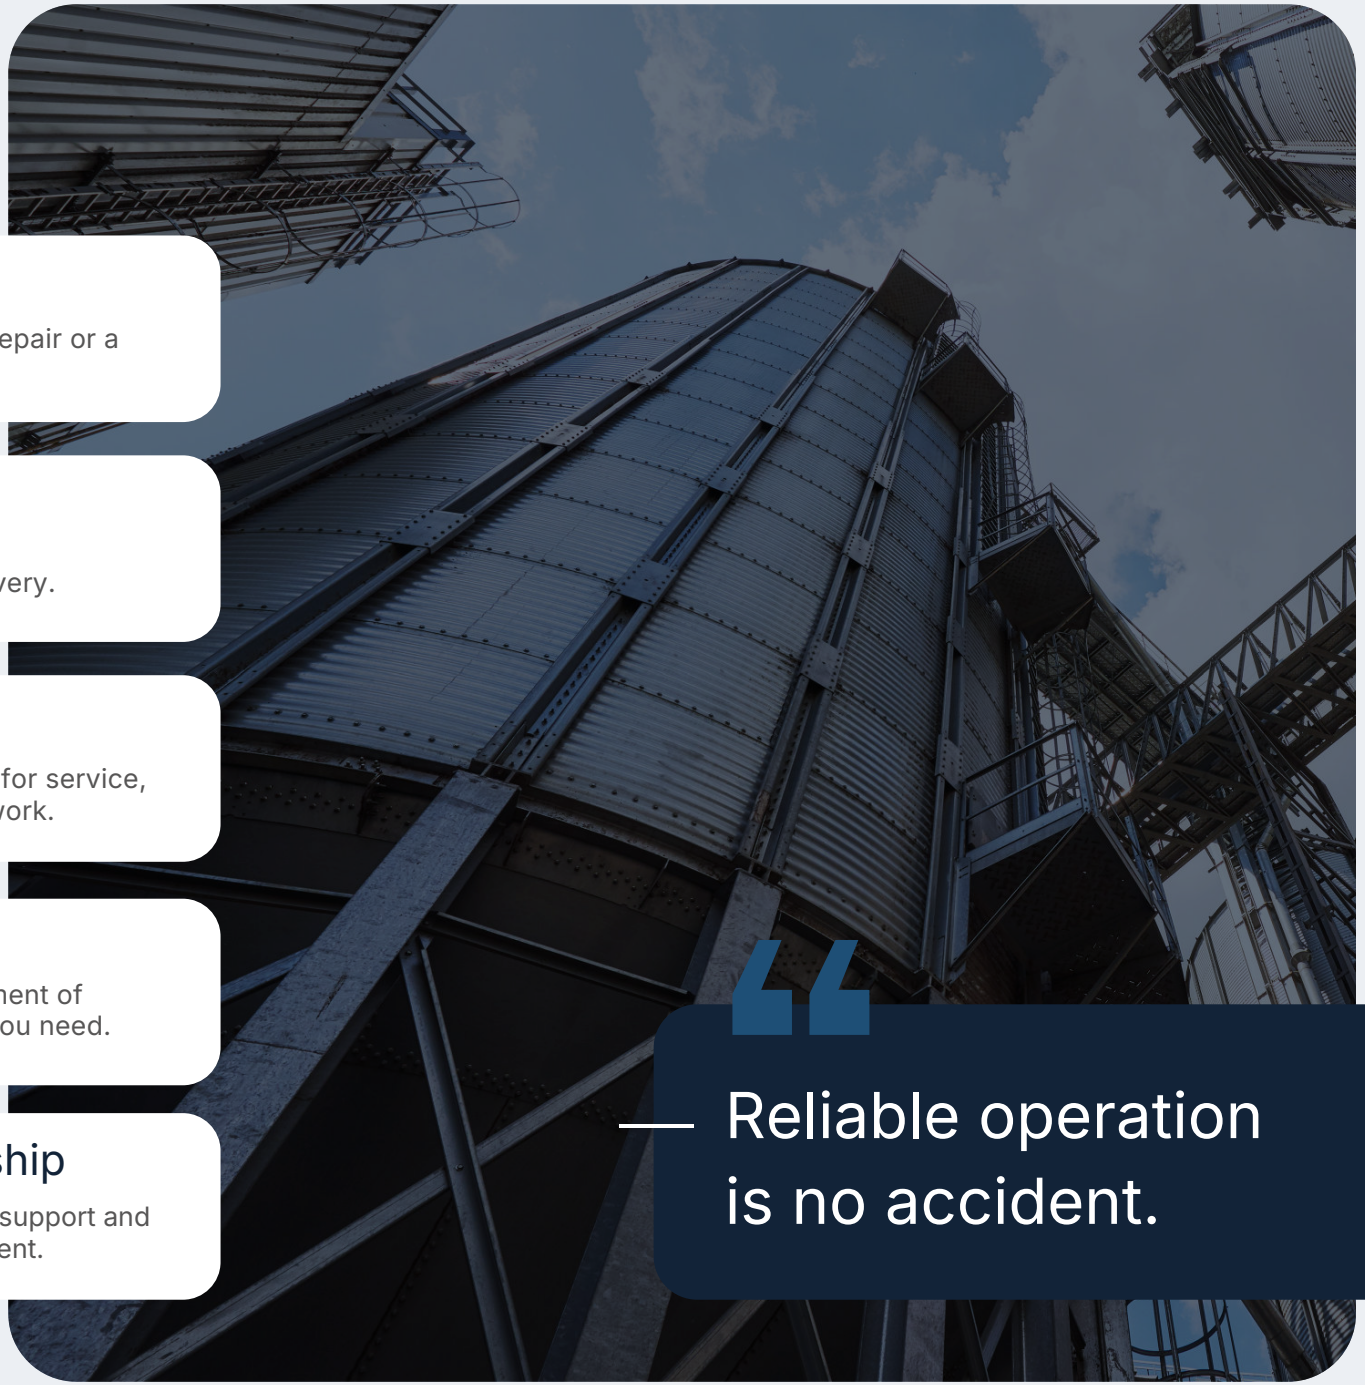

External capacity

Short- or long-term reinforcement of your team with the expertise you need.

05

Long-term partnership

Regular service, maintenance, support and an optional framework agreement.

> Reliable operation is no accident.

FACILITY & OPERATIONAL SERVICES

Technical support you can rely on

We provide technical and operational services that keep production and office sites safe and fully operational.

Technical facility management

Maintenance, technical management and coordination of service work.

Operational support

Minor repairs, technical inspections and essential operational services.

Cleaning services

Cleaning of production, warehouse and office spaces to suit the customer's needs.

REFERENCES

They trust us

Our services are used by manufacturers, construction firms and waste management companies. Every partnership is built around the customer's needs.

BOHEMIA RINGS

BOHEMIA RINGS

Czech manufacturer of hot-rolled seamless steel rings with in-house heat treatment and precision machining.

bohemiarings.cz

BEST.

BEST, a.s.

Manufacturer of concrete paving and building elements for transport infrastructure, public spaces and landscaping.

WHY PILSEN INDUSTRY

Technical support under one coordinator

Knowledge of production

We understand technology, operational constraints and industrial maintenance requirements.

One coordinator

We connect specialist trades and make sure each stage of work follows on smoothly.

Flexible cooperation

From one-off calls through planned shutdowns to long-term technical support.

CONTACT

What challenges does your plant face?

František Štorek

Technical Director

Facing a breakdown, a planned shutdown or a technical project?

Send us a short brief and we'll suggest the next steps.
